EXPERIENCE

Tencent Keen Security Lab, Security Engineer Intern

Xuhui, Shanghai

Project: Hashing Programs for Binary Code Similarity Analysis

August 2023 - Current

- Worked on **BinaryAI**, the binary file security analysis platform developed by Keen Security Lab, which is based on AI security for applications such as Binary Code Similarity Analysis (BCSA), Malware Analysis, and Software Composition Analysis (SCA);
- Contributed to BinaryAI's downstream tasks, including BCSA, Malware Analysis, and Threat Intelligence;
- Designed and deployed new algorithms for **BCSA**, which focuses on large-scale scenarios on the program level.

- Summarized the shortcomings of existing Android malware detection systems;
- Designed a new approach based on deep learning and genetic algorithm for detecting Android malicious components adaptively;
- Improved the performance and robustness of Android malware detection by up to 10% and 20%, respectively;
- Supported fine-granularity Android malicious component detection.
